## Connecticut Milk Cost of Production Estimates for Quarter 4 (October, November, December) 2024

Kimberly Rollins, and Isabella Lawless  
February 7, 2025

This quarterly report was prepared with data from the USDA Economic Research Service, the cost of dairy model at UConn's Zwick Center, and market analysis from the USDA February Dairy Outlook (link below). In the fourth quarter of 2024, milk prices for Connecticut farmers decreased to \$22.52/cwt, \$0.20/cwt lower than in the previous quarter. Over the same period, the cost of production decreased to \$37.69/cwt, \$0.16 lower than in the previous quarter. The monthly average shortfall - the minimum sustainable cost minus the price was \$8.38/cwt, a .80% increase from the previous quarter. This difference was most significantly driven by a decrease in cost of purchased feed. This shortfall remains a substantial burden to producers. We thus see a need for continuing payments to Connecticut dairy farmers under Public Act 09-229.

Looking ahead, USDA ERS January Dairy Outlook reports national milk prices are expected to increase slightly in the first quarter of 2025 (*Livestock, Dairy, and Poultry Outlook*). This is in part due to anticipated decreases in milk production from decreased average number of cows and production per cow (*Livestock, Dairy, and Poultry Outlook*). Despite higher projected milk prices, the minimum sustainable cost of milk production should continue to exceed the price of milk throughout 2025. Connecticut dairy farmers will face additional financial pressure in the absence of Public Act 09-229 payments.

### 2024 Connecticut Milk Cost of Production Estimates, Statistical Uniform Price, and Application of Public Act 09-229

	October	November	December	Quarter 4 Average
	Dollars per Hundredweight			
<b>Total Cost of Production</b>				
Connecticut	\$38.55	\$37.52	\$36.99	\$37.69
<b>Minimum Sustainable Cost of Production</b>				
Connecticut	\$31.61	\$30.77	\$30.33	\$30.90
<b>Statistical Uniform Price</b>				
Hartford, CT	\$22.83	\$22.37	\$22.37	\$22.52
<b>Minimum Sustainable Cost of Production Minus Statistical Uniform Price</b>				
Connecticut	\$8.78	\$8.40	\$7.96	\$8.38
